Assignment for Summer Vacation 2020

Dear Parent,

In order to keep students engaged productively during the summer vacation, we have partnered with LogIQids in creating a special summer assignment for them. This assignment consists of solving personalized worksheets on the LogIQids App/Website for developing mental aptitude, critical thinking, and problem-solving skills.

For this assignment, Team LogIQids has added **20 FREE personalized worksheets** to your LogIQids account. You can login to your existing account on the LogIQids App/Website to access these worksheets. Your account details are the same as before, **while those who do not have an already existing account** can sign up and register themselves by following these steps:

1. Visit LogIQids App or the Website using the links given below:
   App: www.LogIQids.com/get-the-app
   Website: www.LogIQids.com

2. Click on the button "Login/ Register"

   Fill in your and your child's details
   Note: Please enter the city as "Bengaluru" and the correct school name: "K.L.E Society's School, Nagarbhavi"

3. Once your enrollment is complete, you will get a confirmation on your registered email id

To enroll more than one child, please click the button "Add another child" which appears after enrolling the first child. The students need to solve these before 30th April. After this, LogIQids will provide the school with a detailed report about the number of worksheets solved by each student and their overall performance. **Hence, it is crucial that students complete the assignment before 30th April 2020.**

Assignment Details:

- Students must solve the **20 worksheets** assigned to them
- Worksheets must be solved and submitted online **before 30th April** (No need to print these worksheets)
- This assignment is **compulsory for all students**
- **Students NEED NOT take a printout of worksheets and submit them in school to demonstrate the completion of homework. LogIQids will send a report to the school directly.**

For developing consistency in learning habits, it is recommended that your child solves one worksheet a day. Each worksheet takes approximately 20 to 30 minutes to solve.

If you need any help with your login id or otherwise, you can contact the LogIQids team directly:
