

CORNERD

Virtual Game for Children

Dear Parents,

Greetings from Tata Consultancy Services and TCS iON!

In these challenging times of the pandemic caused by COVID-19, we felt that it is necessary to engage the children at home with a game that helps the children to understand the pandemic and exhibit appropriate behavior in a fun way. A thorough awareness about COVID-19 should be our primary concern not only for us but also for our young ones.

CorNERD is a unique game that has been built by TCS iON leveraging its GAMELab framework. The content leveraged in the game has been prepared by experts with young children in mind. Four safe quadrants of the game extensively cover topics like Awareness, Precautions, Personal Hygiene, and Empathy to boost knowledge about ways to fight the virus and improve the general health standards.
