### **A better gift**

This inspirational short story is about a young man who asked his father for a car as a gift for his high school graduation. The young man felt confident his father would buy a car for him because his old man's salary could afford such a purchase.

Imagine his disappointment when graduation day came. Instead of a car, his father gave him a watch.

"I didn't ask for this!" he yelled at his father.

"It's a better gift, my son. You don't have a need for a car. What you have a need for is time and learning to manage it well," his father said.

He felt terrible for having high hopes. And from then on, he had a raging heart and wouldn't want to be in the same room as his father.

Years passed, and the young man saw no reason to speak to his father again.

Without his father providing for him, he learned to work. And worked hard until he realized his father was right.

It was true. He didn't need a car back then.

If his father gave him a car when he asked for it, he wouldn't have learned the value of hard work. Add to that the lesson of managing time.

After this realization, he tried locating and calling his father. He wanted to make amends, admit his fault, and express gratitude for a valuable lesson.

The unfortunate part? He was too late. He got word his father passed away weeks ago.

What he learned from the experience is that his father had his best interest at heart. Though his father didn't show it, he had his back and wanted him to succeed in the long haul.

## **Topic- "HEALTH AND HYGIENE- TIPS FOR BEING A HEALTHY GIRL"**

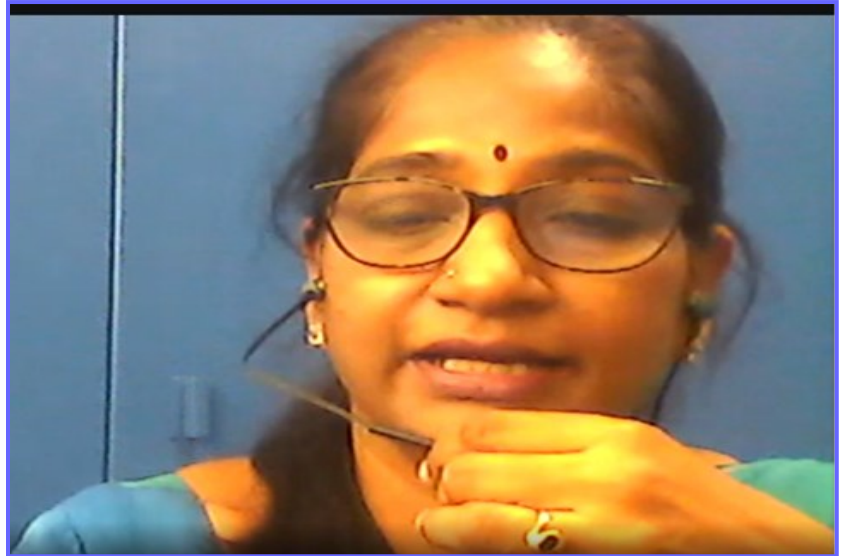

**SPEAKER- Dr. PREMA R**

**HOST- Ms Niti P D**

**Co-host- Varalakshmi N**

**Support team- Laxmi Koudi**

**Conducted for Grade 7 Girls**

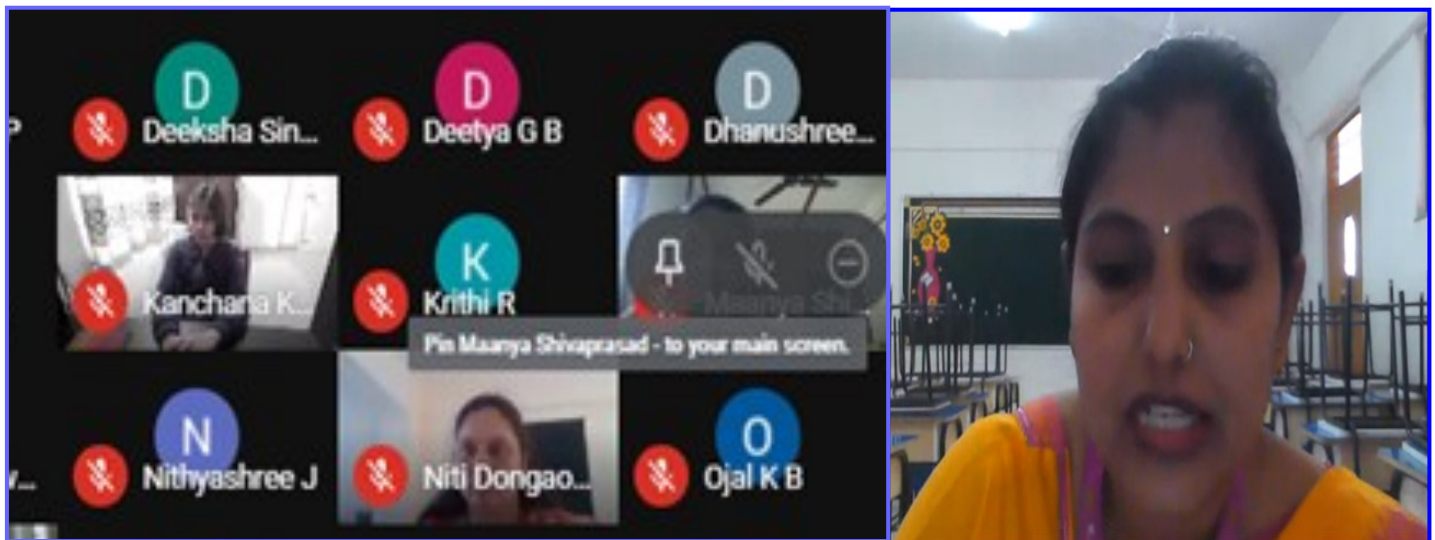

The webinar began with a welcome speech in which the speaker was introduced and also the reason for conducting this webinar was explained by the co-host.

As the speaker took over the presentation, she gave tips for being a healthy girl, she explained how and when do we say we are healthy in the growing age or adolescent age. She taught us to calculate the height using the formula and stated the approximate weight for respective age groups. She gave us the details of food plate and emphasized on the changes observed in our body during adolescence. She threw light on how to overcome certain hard situations like mood swings, biological problems faced like acne, cramps during menstrual cycle etc., Gave detailed explanation on why we should say no to drugs and attraction towards opposite sex by showing pictures of brain development at different ages. She also answered all the queries as she finished her presentation.

The webinar ended with a vote of thanks by the co-host.

The speaker thanked our institute for organizing this program and also appreciated student's involvement in the program.

## Is my height NORMAL?

- Let adolescents Know their height potential
- Formula to calculate Mid Parental Height;  

$$(Mother's Height + Father's Height)/2$$
 Add 6.5 cm in Boys  
 Minus 6.5 cm in Girls  
 This gives Target Height as an Adult  
 ± 7.5 cm for Boys  
 + 6 cm for Girls

## STEREOTYPES

Stereotypes don't define who we are

Not all poets are lonely and envy, apart  
Broken, dark souls straining for light,  
outspoken and proud.

Not all musicians struggle with substance,  
on need to be introverted exhibitionist.

Not all bards are creative genius savants,  
pressed on to the pulse of passion.

And not all multi talents dance for demons,  
under the pale mocking moon,  
resolving life with ellipses.

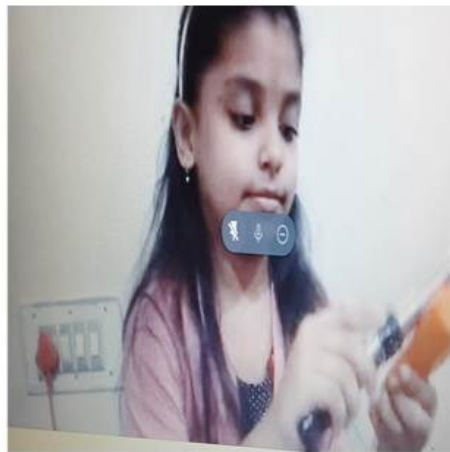

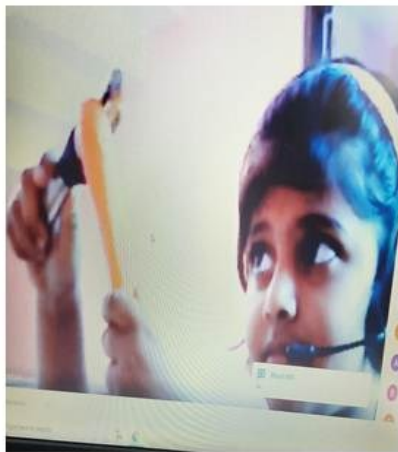

But if you look, listen and see carefully  
There are still, for statistics sake,  
a foolish few of us, remaining.
